Positions: Fellow and ad hoc reviewer, Section of Epidemiology, Public Health & Evidence; Fellow, Section on Hospital Medicine, Council on Quality Improvement and Patient Safety, and Council on Clinical Information Technology
Appointments: Assistant Professor, Pediatrics and Public Health Sciences, Penn State College of Medicine
Professional Society: Fellow, American Academy of Pediatrics; Academic Pediatrics

Statement of Interest

I grew up in Pennsylvania and completed residency at the Children's Hospital of Philadelphia. I worked in primary care in West Philadelphia for two years and then completed a General Academic Pediatrics fellowship at CHOP. I then moved to Winnipeg, Manitoba, Canada for 6 years with my husband, a sports reporter who focuses on hockey. While there I worked as a hospitalist, continued my research, and led quality improvement for the children's hospital. We recently moved to Hershey Pennsylvania (home of the Hershey Bears American Hockey League team) where I am a hospitalist and clinical researcher. If elected to the member-at-large position, I would hope to use my work in the state chapter of the AAP to advocate for the children and pediatricians in Pennsylvania. Some of my advocacy interests are insurance coverage for children with complex health care needs, improving safety for children in inpatient and outpatient settings, prevention of child abuse, and prevention of iron deficiency anemia.

Elaine A. Donoghue, MD, FAAP

Undergraduate: Georgetown University (BS Biology)
Graduate: Tulane University School of Medicine
Residency: Tulane (internship)/Emory (Residency)
Current Practice: Lehigh Valley Health Network; Vice Chair for Academic Affairs, Pediatrics
Current Positions: Council on Early Childhood (member, past co-chair)

Pediatric Immunization Forum- August 9, 2016. Invited panel speaker by Representative Charles Dent.
Pennsylvania Early Childhood Caucus- June 15, 2016. Invited speaker

Statement of Interest

The AAP is a wonderful organization which I have been privileged to work with in a variety of roles over my professional career including on the state level in New Jersey before moving to Pennsylvania and on the national level in the field of early childhood, community pediatrics, and telehealth. If elected, I would be proud to represent my region of Pennsylvania and would endeavor to engage more pediatricians in the AAP on a local, state, regional and national level. My goals would be to advocate for children and represent the interests of children in this rapidly evolving climate, help to integrate the efforts of pediatricians across the state, and to train our next generation of pediatricians to carry the torch forward.
